

Beyond
Go Green

 **PHSI**[®]
PURE WATER TECHNOLOGY

THE PURE WATER TECHNOLOGY™ DIFFERENCE

Your bottled water may have some dirty little secrets...

While promoting an image of health and vitality, bottled water companies burn millions of barrels of oil and generate millions of tons of greenhouse gasses in the manufacturing, processing and transporting of their products. To top it off... an estimated 38 BILLION non-biodegradable plastic water bottles are tossed into our landfills annually!

But just going green isn't enough...

In an effort to reduce the environmental impact of bottled water, some companies have turned to converted bottled water coolers, otherwise known as filter coolers. But filter coolers don't always provide the purity and protection that your employees need. Inadequately designed and improperly maintained filter coolers can actually increase contamination levels and generate high levels of bacteria in a reservoir of unprotected water.

Go Beyond Green!

PHSI Pure Water Technology® systems go way beyond green by not only eliminating the environmental impact of bottled water systems, but by providing you with safer, fresher and better tasting drinking water. We call it *Technology for a Healthy Planet™*.

THE PURE WATER 1R PROCESS...

Activated Oxygen Injection™
Eliminates microbiological contamination, oxygenates the water and delivers freshness you can taste.

Pure-Touch Dispense™
The ergonomic design delivers a convenient dispense height and room for larger containers while keeping user's hands away from the dispensing nozzle.

ATS-Auto Tank Sanitization™
Eliminates microbiological contamination and does away with the tedious and often overlooked task of sanitizing the holding tank.

Microprocessor Control
At the heart of PHSI's patented technology is a microprocessor that controls and monitors activated oxygen injection, filter life, water quality, and all other system functions. Only PHSI's Pure Water 1 can deliver this level of programmability and performance.

Sediment:
- Dirt
- Rust
- Silt

Organic:
- Chemicals
- Solvents
- Chlorine

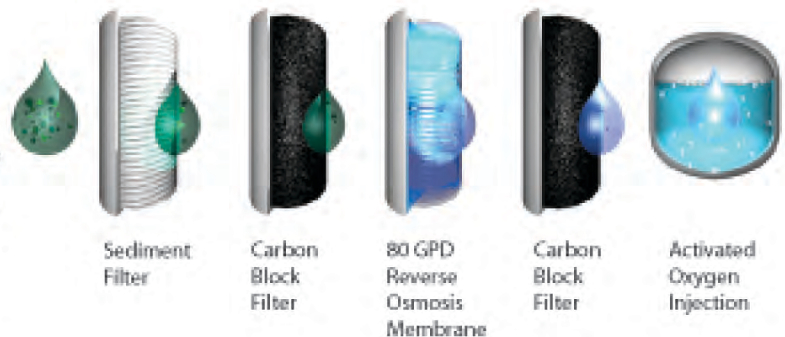

Inorganic:
- Lead
- Mercury
- Arsenic

Final Polish

Microbiological:
- Bacteria
- Viruses
- Parasites

PHSI is the only U.S. based manufacturer of water purification coolers and PHSI's Factory is a state of the art ISO 9001 and 14001 facility. Our pure water systems are tested and certified to the highest North American and European standards for safety and performance, including NSF/ANSI 42,53 & 58, UL, CE and WQA Gold Seal...Because at PHSI, *just* Going Green isn't enough.

NSF/ANSI
42, 53, 58

ISO 9001
ISO 14001

This system conforms to NSF/ANSI 58 for the reduction of Barium, Cadmium, Hexavalent Chromium, Lead, Radium 226/228, TDS and Pentavalent Arsenic only as verified and substantiated by test data. See performance data sheet and Arsenic Facts section for an explanation of reduction performance.

IT'S NEVER BEEN EASIER TO GO BEYOND GREEN

It's Not Bottled...It's Better!

PHSI's Pure Water Technology® systems deliver glass after glass of fresh, cold, high-purity drinking water at the touch of a button.

Now you can go beyond green and eliminate environmentally hazardous plastic water bottles.

Lose the bottles and request a FREE trial today!
